

Resume / CV Draft

Playwright Framework | QA Automation Engineer / SDET

Summary

QA Automation Engineer with hands-on experience in Playwright, Python, and pytest, building scalable E2E frameworks and integrating external workflow automation using n8n. Strong focus on reliable, maintainable automation and documentation.

Core Responsibilities

- Built a Playwright-based E2E framework using Page Object Model for login, cart, checkout, and order workflows.
- Integrated n8n webhook reporting and timeouts to reduce flakiness and handle external service downtime gracefully.
- Managed test data with Excel-based input and created reusable automation patterns for local and CI execution.
- Produced workflow exports and README-based setup guides for local onboarding and reproducibility.

Tools

Python, Playwright, pytest, requests, n8n, SQLite, PyCharm, Git, Excel, CI/CD workflows

Key Strengths

Test Automation, E2E Framework Design, API/Webhook Integration, Reliability Engineering, Documentation, QA Process Improvement
